

LOGISTICS SOLUTIONS

The ability to generate connections
is the main fuel for innovation.

In our world, boundaries cease to exist. The world is intricately interconnected, and leveraging these connections, we navigate the optimal avenues for your innovation and growth.

At Datalog, we are the ones poised to connect you with this boundaryless world. Drawing from our experience, innovative ideas, meticulous planning, all while prioritizing safety, transparency, and quality.

Datalog is a company dedicated to providing its clients with high-performance ***services and excellence in the realm of international commerce.***

Built on expertise and deep knowledge of international freight routines, Datalog enhances its workforce's qualification through specialized courses and ongoing updates. Employing cutting-edge technology in its operations, the company provides clients with secure and expedited solutions, practicing fair and competitive pricing.

OUR MISSION

Delivering top-notch services by blending speed, agility, and reliability for our clients in a secure and efficient manner, while empowering our employees, creating new job opportunities, and fostering social development.

OUR VISION

Setting ourselves apart through integrated engagement in our clients' logistics chain, aiming to cut costs, eliminate operational risks, and optimize lead time performances.

OUR VALUES

Ensuring the satisfaction of all parties involved, maintaining professional commitment to stakeholders and the society we are part of.

AIR

We consistently operate, aiming to strike a balance between optimal routes and minimized costs.

We have a presence in all Brazilian airports as well as major airports across the globe.

We offer choices for consolidated loads, oversize, overweight, hazardous goods, temperature-controlled shipments, along with customized operations to meet specific client requirements.

LAND

Datalog operates in both the domestic and international markets, aiming to satisfy customers with competitive and efficient logistic solutions.

We assess routes and vehicle availability to address even the most specific demands, ensuring tailored operations with optimal cost-effectiveness.

Our presence spans all national border points.

Our fleet consists of tracked vehicles with real-time updates, while we offer comprehensive door-to-door operational management.

MARITIME SERVICES

We offer agile and reliable solutions, covering FCL, LCL, break bulk, and project cargo.
